

ENHANCE YOUR DAIRY'S REPRODUCTIVE SUCCESS

A FASTER, EARLIER RESPONSE TIME MEANS A MORE EFFECTIVE BREEDING PROGRAM.

Learn Ultrasound. Yes, you can!

Refine your skills with 7 hours of hands-on training, live cattle practice, and expert guidance—ensuring you're fully equipped to perform dairy cow reproductive exams with confidence!

We ensure a welcoming and fun learning environment, lots of discussion and hands-on practice. We aim for everyone to leave having learned a lot and truly enjoyed the experience.

From theory to practice, you'll learn to interpret ultrasound images and perform accurate herd pregnancy checks and more.

Why Ultrasound?

"If you want to be more involved in your own repro program, you should absolutely use ultrasound as it will lead to better outcomes. The more active & engaged you are in your own program, the more successful it will be."

Dr. Tom Wheel

The most notable impact on a dairy's economics comes from quick response to early pregnant or open calls & the freedom & convenience to do pregnancy checks on your schedule.

If you've considered the freedom and convenience of pregnancy checks done on your schedule, know that...

- Ultrasound can be learned & used by anyone.
- It offers notable benefits to farms of all sizes.
- Ultrasound is a valuable tool that strengthens reproductive programs, productivity & profitability.

MANY PRODUCERS ARE LEARNING TO ULTRASOUND WITH CONFIDENCE AND SUCCESS. WE'VE DESIGNED COURSES JUST FOR YOU!

Introduction to Dairy Cattle Reproductive Ultrasound is a 2-day, hands-on training limited to a small group.

Through guided hands-on sessions and live demonstrations, attendees will refine gynecological examination skills in dairy cattle.

The curriculum includes identifying ovarian structures in ultrasound images and practical hands-on with live cattle to evaluate ovaries for corpus luteum and cysts.

As well as finding and recognizing twins, a review of common bovine fetal anomalies and fetal demise.

What to Expect:

Lunch is provided for you both days and all course materials.

You'll leave with the skills to confidently apply ultrasound on your farm.
